Procaine Hydrochloride Crystals Squibb

*the U. S. P. product
for spinal anesthesia*

PROCAINE HYDROCHLORIDE is the correct U. S. P. designation for the very useful cocaine substitute first introduced in 1905 and now marketed under various trade names.

Procaine Hydrochloride Crystals Squibb is packaged in sterilized ampuls of sufficient size to allow proper mixing with spinal fluid before injection. Directions for use are enclosed with every package.

It is available in ampuls of 50, 100, 120, 150 and 200 milligrams, 10 ampuls to the package.

For further information regarding Procaine Hydrochloride Crystals and other Squibb Anesthetics, write to Anesthetic Department, E. R. Squibb & Sons, 745 Fifth Avenue, New York.
